

City of Port Orford's Good Neighbor Policy:

Commitment to Community: We share our Expectations of Conduct with guests in multiple ways: on our website, at the time of booking, and upon arrival. These are enforceable standards required by the local jurisdictions. This is good information for residents, too!

1. Neighbors & Noise. The neighborhood's general quiet hours are from 10:00 p.m. to 7:00 a.m.
2. Parking. Parked vehicles may not block driveways, bike lanes, or emergency vehicle access lanes. Obstructed access means delays, and delays could cost someone's life. Park Smart.
3. Speed Limits. Be mindful of posted speed limits. If you're not sure, slow down.
4. Garbage. All garbage will be put in the provided secure containers and will be picked up once a week.
5. RVs. Occupied trailers and tents are not allowed on the premises at any time.
6. Pets. Leash your pet, unless you are in a clearly defined off-leash area, and clean up after them. Unattended barking dogs are prohibited.
7. Events are not permitted in Residential zones 1-R and 2-R.
8. Fires. Fires are only allowed in designated areas, and should never be left unattended. Outdoor fires are prohibited in Port Orford during many months of the year. Check with the Coos Forest Protective Association (CFPA) on current restrictions before lighting any outdoor fires. www.cfpa.net (541) 267-3161.
9. Drones. Be mindful of where you are flying, and respectful of private property and wildlife. Some State parks prohibit drone use,
10. Be Water-Wise. Port Orford is experiencing a water shortage. Please conserve water whenever you can during showers or dishwashing, etc. City Ordinance 2022-04 prohibits washing cars, watering shrubbery and other non-essential water uses until our water system is fixed and the curtailment ends. The complete Ordinance is at: <https://portorford.org/pdfs/2022/20220307085205611.pdf>, or just search, "Port Orford water curtailment" in your browser. Sinks, toilets and showers should follow U.S. EPA WaterSense standards and guidelines. www.epa.gov/watersense.

Thank you!
